

Laboratory of Fundamentals of Nursing Department

Over view:

The College of Nursing is one of the applied scientific colleges that depends greatly on the presence of practical laboratories in order to rehabilitate and prepare students to be able to acquire nursing skills before application on the ground. Inside hospitals and health institutions so that the theoretical side integrates with the practical side.

Experiments have proven that the good preparation for nursing students within the practical laboratory contributes to the bridge of the gap between the theoretical and practical side on the one hand and on the other hand enhances the self -confidence of students.

There is no doubt that providing an environment that simulates the hospital and health institutions environment by ensuring the preparation of laboratories equipped in a large extent that these institutions would contribute to raising the professional and technical performance among nursing students, and this is what drives the college to strive to keep pace with everything that is new and fits age.
